

BML Research-2009

Meetings in the South Lounge, Mondays at Noon

Date	Speaker	Title / Topic
13 July	John Largier	Whither the water? Exposure of nearshore environments to San Francisco Bay outflow
10 Aug.	Don Mykles	Myostatin and ecdysteroid signaling in crustacean skeletal muscle
24 Aug.	Al Carranza	Reflecting upon the PEEIR project: Spectral reflectance and PAM fluorometry as indicators of contamination-induced stress in salt marsh plants
14 Sept.	Will White	Spatially explicit estimates of pelagic larval mortality: models and data
21 Sept.	Karen Shapiro	California sea otters, cat feces, and estuarine wetlands: how coastal habitat degradation impacts the health of a threatened species
28 Sept.	Sarah Flores	Assessing environmental responses to anthropogenic impacts in Tomales Bay, CA
12 Oct.	Sarah Myhre	Cold corals, ocean sediments and the biology of climate change
19 Oct.	Sarikka Attoe	On to another mollusk: The Jumbo Squid diet in it's expanded range.
26 Oct.	Susanne Brander	Endocrine disruption in Suisun Marsh: response of a resident species to different sources of estrogenic compounds
2 Nov.	Ji-Yeon Shin	Feeding mechanism of large Mesozoic fossil chimaeroids: How large a shell could they crush?
9 Nov.	Renate Eberl	Tales of isopods and microbial associations
23 Nov.	Steven Morgan	What's limiting larval recruitment to communities along our coast?
7 Dec.	Jackie Sones	Two hundred years of intertidal research at Bodega Head
21 Dec	Gary Cherr	Reproduction & innate immunity: Is there a connection?
